PROFESSIONAL SUMMARY

Highly motivated and versatile web developer with a strong foundation in Java, J2EE, Spring Boot, Hibernate, ASP.NET, and a proficiency in front-end technologies like React, JavaScript, HTML, and CSS. Skilled in creating end-to-end web applications, I've developed projects using React, Spring Boot, Node.js, and ASP.NET for back-end functionality, with SQL and MongoDB as database solutions. My educational background includes a PG Diploma in Advanced Computing from CDAC, and I bring a solid grasp of data structures and algorithms to my development work, ensuring efficient and optimized code.

PROJECTS

1. Title : PetActive
Platform : J2EE(Spring boot), React, Mysql
Duration : 1 Month
Description : PetActive is a comprehensive web platform that seamlessly integrates React frontend, Spring Boot backend, and MySQL database technologies. Offering an intuitive interface, it encompasses e-commerce for pet accessories, ethical pet purchase/adoption, virtual veterinary services, detailed pet care guides, and a robust pet services marketplace. PetActive revolutionizes pet care by harmonizing advanced tech with responsible pet ownership, catering to diverse needs while ensuring data security and user privacy.

2. Title : e-Notebook
Platform : MERN Stack
Duration : 10 Days
Description : E-Notebook, a React-based web project on the MERN stack, introduces an advanced digital documentation solution. Seamlessly integrating MongoDB, Express, React, and Node.js, this platform offers a modern, efficient way to create, organize, and manage notes. Users benefit from real-time collaboration, customizable organization, and secure data storage. With React's dynamic interface and the MERN stack's robust architecture, E-Notebook transforms note-taking into a user-friendly and collaborative experience. From professionals to students, this project caters to a wide range of users seeking a streamlined solution for their notekeeping needs.

3. Title : Slack-Clone
Platform : React Js, Firebase (https://slack-full-clone.web.app/)
Duration : 5 Days
Description : Slack-Clone is a real-time chat application built with React, Redux, and React Router for the front-end. Firebase serves as the secure backend, handling user authentication and authorization. This project replicates Slack's features, including channels, direct messaging, and user profiles, providing a seamless and secure team collaboration experience.
